Recall #: CAN234 | 234- Remedy Notice - Certain 2006-2010 MY Corolla, Matrix, Highlander, Tacoma, RAV4, Yaris vehicles - Spiral Cable Recall Date: 2014 Apr 09

Recall Description

The steering column assembly in the involved vehicles contains a spiral cable assembly with electrical connections to the drivers airbag module that could become damaged when the steering wheel is turned. If this occurs, the airbag warning lamp will illuminate. In addition, the drivers airbag could become deactivated, causing it to not deploy in the event of a crash. This could increase the injury to the driver.

Remedy

Toyota dealerships will replace the spiral cable assembly in the subject vehicle.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact TOYOTA or visit [Toyota's website](https://www.toyota.ca/toyota/en/owners/recalls).

Recall #: CANR10 | R10 - Remedy Notice Certain Toyota Camry, Camry HV, RAV4, Corolla, Matrix, Tundra, Sequoia, Highlander, Yaris, Scion xB and Scion xD vehicles (2006 - 2011) Power Window Master Switch Assembly

Recall Date: 2015
Oct 21

Recall Description

The Power Window Master Switch (located on the driver's door) in the above vehicles may have been manufactured with insufficient lubricant grease. If sufficient grease is not applied, under certain conditions the switch may develop a short circuit that can cause the switch assembly to overheat and melt. A melting switch can produce smoke and potentially lead to a fire.

Remedy

The remedy will involve an inspection, switch disassembly, and application of a specialized grease. In a limited number of cases, the electronic circuit board in the Power Window Master Switch will be replaced.

Recall #: CANR75 | R75 - Remedy Notice - Multiple Toyota Models and Model Years - Front Passenger Airbag Inflator Recall Date: 2019 Jan 09

Recall Description

The subject vehicles are equipped with front passenger airbag inflators produced by Takata. The propellant in these inflators may degrade after prolonged exposure to high absolute humidity and fluctuating high temperatures. Degraded propellant can cause the inflator to explode during airbag deployment.

Remedy

Toyota will replace the airbag inflator or the airbag assembly.
